Career Objective

Motivated by curiosity and eager to improve myself, I am looking for a career where I can demonstrate my solid **Frontend** skills in **React** and **Next.js** across a variety of challenges and overcome them using my open source knowledge.

Education

Cukurova University: Computer Engineering **Degree:** Bachelor of Sci. **GPA:** 3.34 **Sep 2018-Nov 2023**

Technical Skills

- **Languages:** SQL, NoSQL(MongoDB), HTML, CSS, JavaScript and TypeScript
- **Libraries and Frameworks:** React, Next.js, Redux, Tailwind and Bootstrap
- **Tools:** VSCode, Git, Docker, Postman, Github

Projects

Threads App Clone: Web application where users can share their ideas on a topic and discuss it under the post

- Used **Next.js** with **TypeScript** to build the frontend and style with **Tailwind CSS**.
- Used **Next.js Route Handlers** to build **RESTful APIs** and used **Clerk** for authentication and to create organizations which can have up to 5 users.
- Used **Mongoose** to store users' data in **MongoDB Atlas**

Next Auth: Web application where users can authenticate to app with **Two-Factor-Authentication**.

- Used **Next.js** with **TypeScript** to build the frontend and style with **Tailwind CSS**.
- Used **Next.js Route Handlers** to build **RESTful APIs** and used **NextAuth.js**(old version of **Auth.js**) for authentication.
- Used **PostgreSQL** to store users' data and to model these datas and to run schema migrations with **Prisma**.

Promptopia: Web application where users can share blogs.

- Used **Next.js** with **Javascript** to build the frontend and style with **Tailwind CSS**.
- Used **Next.js Route Handlers** to build **RESTful APIs** and used **NextAuth.js**(old version of **Auth.js**) for authentication.
- Used **Mongoose** to store users' data in **MongoDB Atlas**

Anime Vault: Web application where users can access to get most known animes.

- Used **React** with **TypeScript** to build the frontend.
- Used TailwindCSS to style project
- Used **Framer-Motion** for animations.
